## Projects - www.liamwest.co.nz

### Harry and Sam Booking App - (In Development)

<https://github.com/LiamWestNZ/HarryAndSam-Frontend>

<https://github.com/LiamWestNZ/HS-Backend-Public>

A web app for dog grooming company Harry and Sam, allows users to register themselves and their pets, book grooming and photography appointments

- REST API backend using Python and Django.
- Single page application frontend with HTML, JavaScript, React, JSX, and SCSS.
- Token authentication and Redux for authentication state.
- PostgreSQL Database.
- Utilises AWS for static content and SMS automation.

### LitterBox Social Media - (In Development)

<https://github.com/LiamWestNZ/LitterBox>

A Twitter inspired social media.

- REST API backend using Python and Django.
- SQLite for the Database.
- JavaScript and React for main application functionality but uses Django's built-in functionality for template rendering, authentication and routing.
